Re: Testimony against Common Core Assessment Testing

Dear Esteemed Committee Members,

You've heard many many hours of testimony from Michigan citizens and experts testify against Common Core Curriculum. Still you did not listen and jumped into it with both feet. Here we are again before you asking for prudence and good judgment.

Why adopt these testing and assessment methods when the jury is still out on the viability and credibility of Common Core?

So please act in an unhurried and deliberate way.

Let's wait and see how the Common Core Curriculum is working in our schools, put it on trial, before we commit to it even more. Please, do not adopt the Assessments aligned with Common Core State Standards at this time. Wait until we know more.

Respectfully yours,

Isabelle Terry
